EXPERIENCE

JASCI Software — Software Engineer

Melbourne, FL · 2023 — 2026

Smart Warehouse Management. Multi-tenant SaaS for 20+ 3PL customers and 500+ concurrent users. Production on-call.

- Shipped an AI action layer (MCP tools, JSON Schema contracts, audit logging) that collapsed multi-screen warehouse workflows into single requests.
- Cut inventory search from 10+ seconds to sub-second on million-record tables by removing N+1 access (~95% fewer round trips).
- Designed tenant-scoped OAuth 2.1 isolation (tenant from the token, never a client header) and a configurable 3PL billing engine with idempotent reruns (~10 hours of recon saved per customer / month).
- Moved long-running work onto async jobs after commit; carried on-call across 20+ sites.

Sonos — Software Engineer Intern, Universal Search

2022

- Kafka change-event pipeline into the search index plus a Redis query cache — search speed +30%.

Tencent — Software Engineer Assistant, WeChat identity & payments

2020

- Spring Boot APIs with Redis caching (~30% database load). JMeter at 8,000 concurrent users, P99 -30%.

SELECTED SYSTEMS

Clearbay — Multi-tenant 3PL API: JWT tenant isolation, idempotent billing, optimistic concurrency, MCP guardrails. Java / Spring Boot. Live: clearbay.onrender.com

Grantline — Passwordless Go access broker: ed25519 grants for humans, machines, and agents; policy-checked sessions; server-side pagination. Live: grantline.onrender.com

Dockline — Eval-first agent over Clearbay MCP. 40 deterministic cases; the model is never the judge. Live: dockline.onrender.com

Durable Brief — Vercel Workflows desk: parallel research, evaluator loop, human approval hook. Live: durable-brief.vercel.app

PulseQueue — TypeScript queue with lease exclusivity, exponential backoff, DLQ, live SSE dashboard. Live: pulsequeue-wokz.onrender.com

EDUCATION

Carnegie Mellon University — M.S. Electrical & Computer Engineering

2022 · Pittsburgh, PA

Florida Institute of Technology — B.S. Electrical & Computer Engineering

2021 · Melbourne, FL

SKILLS

Java, Go, TypeScript, Python, SQL · Spring Boot, React, PostgreSQL, Redis, Kafka, OAuth 2.1, MCP · AWS, GCP, Docker, Kubernetes

CREDENTIALS

Google Cloud Professional Cloud Architect · Inventor, CN205178942U (flexible-solar emergency power)
